## »» PARAGON MARKETS

Understanding and preventing security threats begin with understanding the facility itself. Each type of building can present unique situations and all require individual methods of response and prevention. At Paragon we pride ourselves in understanding the different types of facilities and the people who use them. From residents to shoppers, employees to patients, everyone has their own needs and concerns. Our guards are trained to understand them all.

Review our market sectors, you'll find similarities in your own building type. We invite you to talk with one of our security specialists about your building, whether you're looking for a guard solution or a response strategy, answers can be found with Paragon.

## »» TRAINING

*Paragon invests in industry-leading training for its recruits & retains guards longer than our competitors.*

We employ accountable, professional, helpful, responsive candidates who are fit to meet the demanding standards of our clients. Before a successful applicant appears on client premises as a Paragon guard, we teach that person to manage the responsibilities our guards are expected to handle. Training also gives Paragon the chance to determine which client and/or type of facility the new guards are best suited for.
